

Statement of the Treasurer

The Treasurer is required to produce an annual statement showing detailed information about each reserve fund established to account for development charge revenues. The statement will document the continuity of each reserve fund, including the description of each service, opening and closing balances, details of any credit transactions, details of any borrowing from the reserve fund that may have occurred, the amount spent on growth related projects, the portion of each project that is funded from the reserve fund and the portion funded from other sources of financing.

Purpose of Development Charges

Development charges assist in financing capital projects required to meet the increased need for services resulting from growth and development. Development charge funds may only be used for the purpose for which they are collected as outlined in the Development Charge Background Study.

Application of charges

The development charges are levied County-wide. There are no area charges.

Annual adjustments

The development charges will be adjusted annually on January 1 of each year without amendment to the by-law in accordance with the most recent annual change in the Statistics Canada Quarterly Construction Price Statistics.

Matching of Local Development Charge Exemptions

The County shall match local municipal DC exemptions as they exist in the local municipal DC by-law only, as amended from time to time.
